

# Tungenes Lighthouse

# History

The background of the slide is a dark blue silhouette of a lighthouse tower. The tower has a square base, a cylindrical middle section, and a conical top with a lantern room. To the right of the tower, there is a tall, thin pole with a lantern at the top. The sky is a lighter blue, and several power lines are visible in the upper left corner.

The lighthouse was first built in 1828 and was decommissioned in 1984.

Later it was rebuilt into banquet facility and soon will open a maritime museum.

There are rental opportunities in the cafe and in the earlier serviced residence.

The building can hold up to 60 people at once.

The background of the slide features a blue gradient sky with white clouds. In the foreground, there are dark silhouettes of a lighthouse structure on the left and a person standing on a hill on the right. The person appears to be holding a camera or a similar device up to their eye. The overall scene is peaceful and scenic.

# About the Lighthouse

The purpose of this trip is  
to appreciate the culture  
around us and not be so  
dependent on digital media  
as an entertainment source.
